MEDITERRANEAN SEA PILOT BOOK ITALY

SICILY

**Aeolian and Aegadian Islands,
Pantelleria and Lampedusa**

MALTA

FIRST EDITION 2023

This pilot covers the coasts of Sicily, its off-lying islands (Aeolian and Aegadian Islands, Pantelleria and Lampedusa, as well as Malta and its archipelago).

This pilot and its 130 user-friendly charts show all of the available harbours, marinas and anchorages within this cruising area.

The introduction includes a table with distances and the main routes, a list of useful charts, as well as local weather information.

The entire area is divided into six chapters. Each one has its own quick guide that includes waypoints, harbour and marina facilities (e.g. water and electricity, fuel, repairs). At a glance, you will be able to decide where to head based on your yacht and the weather. Each chart has an icon that shows the harbour or bay position within the navigation area. This way you will always know exactly where you are.

This pilot comprises numerous plans for harbours, marinas, bays and anchorages, each with a wealth of practical symbols and overviews providing complementary information to pilotage notes so that you can sail with peace of mind. A handy wind-rose icon gives wind direction and exposure for each plan..
