ISBN	978-88-85719-70-5
Edition	1. edition 2019
Language	English
Pages	216, full colour
Size	A4
Binding	Soft cover
Price	€51.00

ISBN 978-88-85719-70-5

## BY THE SAME AUTHOR

978-88-85719-72-9

**LUCA TONGHINI** was born in Brescia, north Italy, in 1961. His early sailing experiences were on Lake Garda. After years of sailing the Tyrrhenian Sea, Luca has recently embarked on an extensive cruise around the Mediterranean in a bid to explore its myriad bays and anchorages, as well as to conduct surveys of all its ports. His love for cartography, offshore yachting and technical drawing has led him to combine his skills to write pilot guides.

## MEDITERRANEAN SEA CHART-GUIDES ITALY & CORSICA 2

### Ligurian Sea - Northern Tyrrhenian Sea Corsica - North Sardinia

#### First English edition 2019

A pilot is a fundamental companion to nautical charts and contains all the information that a yachtsman needs, but cannot be included on the charts themselves.

This guide and its **162 user-friendly charts** show all of the available harbours, marinas and anchorages within this navigation area.

The introduction includes a table with distances and the main routes, a list of printed and digital charts, as well as local weather information.

The entire area is divided into six macro-zones. Each one has its own quick guide that includes waypoints, harbour and marina facilities, plus the main features of local anchorages (e.g. nature of the seabed, shelter, facilities ashore). At a glance, you will be able to decide where to head based on your yacht and the weather.

Each chart has an icon that shows the harbour or bay position within the navigation area. This way you will always know exactly where you are.

This guide also comprises **146 plans for harbours and marinas**, and **371 plans for bays and anchorages**, each with a wealth of practical symbols and overviews providing complementary information so that you can sail with peace of mind. A handy wind-rose icon gives wind direction and exposure for each plan.
