Publisher	Edizioni il Frangente
ISBN	978-88-3610-004-0
Edition	1st edition 2020
Language	English
Pages	280, full colour
Size	A4
Binding	Soft cover
Price	€ 56,00

MEDITERRANEAN SEA CHART-GUIDES GREECE - IONIAN SEA

Ionian Islands Gulf of Patras and Gulf of Corinth Southwestern Peloponnese

First English edition 2020

A pilot is a fundamental companion to nautical charts and contains all the information that a yachtsman needs, but cannot be included on the charts themselves.

This guide and its 200 user-friendly charts show all of the available harbours, marinas and anchorages within this navigation area.

The introduction includes a table with distances and the main routes, a list of printed and digital charts, as well as local weather information.

The entire area is divided into eight macro-zones. Each one has its own quick guide that includes waypoints, harbour and marina facilities, plus the main features of local anchorages (e.g. nature of the seabed, shelter, facilities ashore). At a glance, you will be able to decide where to head based on your yacht and the weather.

Each chart has an icon that shows the harbour or bay position within the navigation area. This way you will always know exactly where you are.

This guide also comprises 221 plans for harbours and marinas, and 413 plans for bays and anchorages, each with a wealth of practical symbols and overviews providing complementary information so that you can sail with peace of mind. A handy wind-rose icon gives wind direction and exposure for each plan.

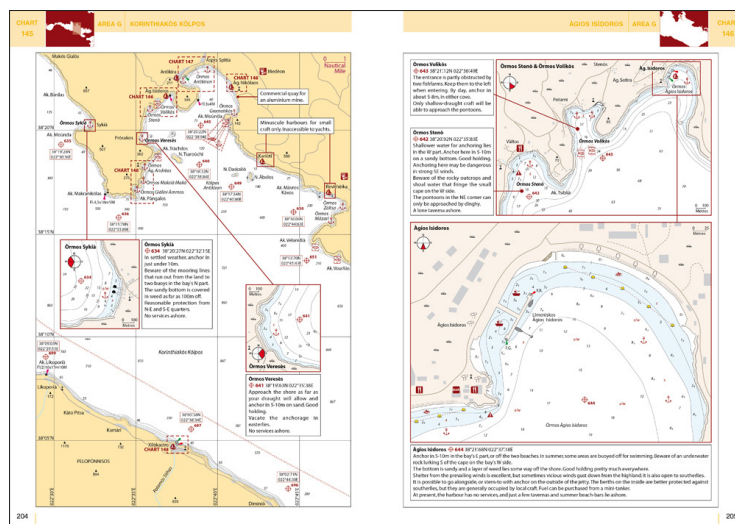

The pilot numbers:

904 WAYPOINTS WGS 84

200 CHARTS

221 HARBOURS AND MARINAS

413 BAYS AND ANCHORAGES

THE AUTHORS

NICOLA TRENTINI, is from the Trentino region, north Italy. He has a wealth of experience as he has taught sailing for around 15 years and co-owned a yachting school in Italy. Nicola has sailed in the Atlantic, South Pacific and Mediterranean on Lycia, a 60' sailing yacht. He has worked with Edizioni il Frangente for a number of years, first correcting the nautical charts of the Italian Navy's Hydrographic Institute and currently authoring pilot guides. As part of this new adventure, he has been living in Greece since 2015 collecting data and information that make his pilots the height of reliability.

CONNIE CHRONOPOULOU, is from Athens although she was born in the US. She graduated in computer informatics and speaks fluent Italian, English and French. She is passionate about the sea and is a qualified sailing and motor yacht skipper. Connie's IT and nautical skills have enabled her both to co-author this pilot and to carry out the painstaking and highly technical work behind its design. She and Nicola live together on a sailing yacht in their quest for invaluable cruising information..
